

**We are Classic Software and Services.** We combine state-of-the art technologies with decades of experience to bring your organization the software solutions necessary to stay at the leading edge. And, we deliver with the caliber of service and support that is expected from a leader.

## What we do:

### CONSULTING SERVICES

- Strategy
- System Architecture and Design
- Workflow Analysis
- Large System Integration
- Contract Computer Programming
- IBM Payments Director (IPD)
- User Exit Design and Implementation
- Business Rules Migration
- System Support and Training
- Migration and Support to version 1.7, or 2.0
- Image Capture - from the table top scanners to the IBM 3890 and everything in between.
- Software Earnings Payments Navigator System Support and Training
- EIS Keying
- ETS Balancing, Cash Letter, Settlement
- OnTrac
- Payments Distribution Manager
- User Exit Design and Customization

### TURNKEY SERVICES

- Super Migration Plus
  - Data Conversion Service
  - Simplify back office operations by merging archives,
  - Data conversion of the entire contents of one archive to another,
  - No hardware to buy, no software to buy

### PRODUCTS

- Classic Tiff Purifier
  - Cleans up Non-conforming items (NCI)
  - Nearly eliminates items being rejected by sensitive archives
- Classic IPD IIA Optimizer
  - Reduces the number of Image Integrity Analysis false positives
  - Routes near miss items to a Keying application rather than to rescan
- Classic Large Table
  - Perform lookups into millions of items quickly
  - Supports migration and mergers with other institutions
- Classic ImageMark Conversion Service
  - Integration Tool used to aid in migration from the NCR ImageMark Archive

Whether it's Consulting Services, Contract Computer Programming or other customized services, Classic Software and Services stands ready to provide the knowledge and expertise to stay ahead of the competition. We welcome the opportunity to explore the opportunities.
